

[ADAPTER FOR CONNECTING A MOBILE PHONE STEREOEARPHONE-MICROPHONE SET TO A STEREO SYSTEM]

Abstract

An adapter for connector a mobile phone stereo earphone-microphone set to a stereo audio system is provided such that the stereo earphone-microphone set of a mobile phone can also be used on another stereo audio system via the adapter. The stereo audio system includes the multi-media device in a computer or a portable music system. Through the adapter, the range of application of an existing mobile phone stereo earphone-microphone is extended.
